ROCK PLACER MINING. Bearing Closest Investigation.

Bearing Closest Investigation.

I am offering for sale, in blocks to suit, a limited amount of the Treasury Stock of the A. F. Schmitz Alaska Dredging and Mining Company at \$1.00 per share, fully paid and non-assessable, on which stock purchasers will be reimbursed the amount subscribed by them before any dividends are declared, after which they draw dividends regularly. At least 50 per cent of the amount subscribed will be repaid purchasers at the end of this year's mining season, and the balance within the mining season of 1905. The mining property includes 45 claims, 30 claims commencing at the mouth of Big Manook Creek, covering a distance of about 9 miles; 4 claims in Hunter, and 3 claims in Hoosier Creek, including also 8 bench claims adjoining Big Manook, at Rampart, Alaska, from which millions of gold dust and nuggets have been taken. It is the best Alaska Mining proposition ever offered to the public, and will bear the closest investigation. The gold is taken directly from the bed rock of the creek by an improved, newly discovered dredging and suction process, at a very small cost. Many tests and assays have been made, the gold averaging \$19.00 per ounce, representing the highest grade of the precious metal found anywhere. With the new process and machinery 1,000 yards of pay dirt per 24 hours can be worked, which promises a yield of from \$1.00 to \$4.50 per yard. The property is now successfully operating, and this stock is offered simply for the purpose of enlarging its facilities and increasing the output. Samples of the gold (dust and nuggets) taken from this property, together with maps, printed matter, etc., will be shown and explained. The stock is offered and orders will be taken by the company's authorized representative.
